

# Biocontrol Release

## Step By Step

1. Release biocontrol agents within 24 hours of receiving.
2. To store “bugs”: Keep biocontrol agents on the bottom shelf of refrigerator. Do not freeze.
3. Release at least 1 full can in a site. All on one plant.
4. Record release in Ibiocontrol app. (Don't forget to upload your data when you get home.) If you do not have ibiocontrol, record a GPS coordinate or map location.

Ibiocontrol for Ipad and Iphone:

<https://apps.apple.com/us/app/ibiocontrol/id717210517>

Ibiocontrol for android devices:

<https://play.google.com/store/apps/details?id=com.bugwood.ibiocontrol>

5. Take at least one picture. You can do this in the ibiocontrol app or on your phone.
6. Send Location and Photo to Amber at [Utahbuggirl@gmail.com](mailto:Utahbuggirl@gmail.com). If you used Ibiocontrol, this will be done for you.

You are releasing: (Scientific name) \_\_\_\_\_,  
(Common name) \_\_\_\_\_.

These biocontrol agents come to you courtesy of the Utah Department of Agriculture, Utah Weed Supervisor's Association, and US Forest Service.
